

Global Graph Attribute Changes

You can make global text and other attribute changes by selecting a graph, or pressing Ctrl+A to select everything on a page, then using the Tools and Text ribbons on the Graph Page tab.

1. Change text font and color
2. Change line color

This is the sample graph from Help > SigmaPlot Sample Graphs > Example 5.

Box Plots with Variable Widths

Example 1:

Change the font type and color of all graph and axis titles.

In the Graph Page ribbon, Text section, select font "Courier New" and color "blue".

Box Plots with Variable Widths

Example 2:

Change the color of all lines in one step.

In the same ribbon, Tools section, press the Line Color button and select “blue”.
