Export von formatierten Arbeitsblattdaten (Dezimalstellen) über die Zwischenablage

SigmaPlot kann die Arbeitsblattdaten in die Zwischenablage (Clipboard) kopieren
  a) mit maximaler Dezimalstellenzahl (full precision), oder
  b) mit der Dezimalstellenzahl, die im Arbeitsblatt angezeigt wird (Worksheet > Format)

Zur Auswahl zwischen diesen beiden Optionen wählen Sie unter Main (Button) > Options > Worksheet > Numeric: Copy and paste.

Wählen Sie
- Copy numeric data with full precision, oder
- Copy numeric data with display precision
Beispiel:

<table>

<tr>
<th></th>
<th>1-Y Data</th>
<th>2-Y Scatter</th>
<th>3-Y Error</th>

Anmerkung:
Diese Einstellung in Options > Worksheet hat keinen Einfluß auf den Export in eine Textdatei (.txt, .tab, .csv) vom Home-Ribbon aus > Export > Worksheet. Hier wird mit “full precision” exportiert.
