

## Export worksheet data as formatted (decimal places) to the clipboard

SigmaPlot can copy worksheet data to the clipboard

- a) in full precision, or
- b) with the number of decimal places which are set in the worksheet.

To switch between both options select the Main button > Options > Worksheet > Numeric: Copy and paste.

Then choose from

- Copy numeric data with full precision
- Copy numeric data with display precision

**Example:**

	1-X Data	2-Y Scatter 1	3-Y 1 Error	4-Y Line 1
1	1,0000	0,6000	0,2400	1,1700
2	2,00	3,20	0,54	3,02
3	3,00	3,30	0,52	3,96
4	4	3,8	0,40	4,430
5	5,0000	4,7000	0,2600	4,6700
6	5,000e+0	4,700e+0	2,600e-1	4,670e+0
7	5e+0	4,70e+0	2,600e-1	4,7e+0
8	abcde	ABC DEF	31/12/2015	31.12.2015

**“full precision” copies to**

```

1,0000000000000000 0,6000000000000000 0,2400000000000000 1,1700000000000000

abcde ABC DEF 31/12/2015 31/12/2015
  
```

**“display precision” copies to**

```

1,0000 0,6000 0,2400 1,1700
2,00 3,20 0,54 3,0200
3,00 3,30 0,52 3,96
4 3,8 0,40 4,430
5,0000 4,7000 0,2600 4,6700
5,000e+0 4,700e+0 2,600e-1 4,670e+0
5e+0 4,70e+0 2,600e-1 4,67
abcde ABC DEF 31/12/2015 31/12/2015
  
```

(pasted into an editor, e.g. Notepad)

**Note:**

This setting in Options > Worksheet does not affect the export to a text file (.txt, .tab, .csv) from the Home ribbon > Export > Worksheet. Here export uses full precision.
